CSA B51:19 | Mechanical Industrial Equipment | CSA Group

Both Canada and the United States use the ASME Section VIII-1 code for pressure vessel construction but Canada has a CSA B51 standard that provides a more restrictive definition of what a PRESSURE VESSEL is. Canada also registers FITTINGS - items that in other countries would be considered too small to need registering.

CRNs follow a format as specified in CSA B51 and are first issued by the region identified by the digit following the decimal point. Other registration numbers for alternative or special designs are issued numbers with a different format, but they are relatively rare. CRN numbers are unique for each design.

When Is a CRN Number Required? And Why.

The Canadian Standards Association (CSA) developed standards for the fabrication of Boilers, Pressure Vessels and Pressure Piping under the auspices of CSA Standard B51-03 (Boiler, Pressure Vessel and Pressure Piping Code). This code is established to maintain agreed-upon standards of quality,
