Facets accumulation reflects a set of documents over some facet requests: Document set - a subset of the index documents, usually documents matching a user query. Facet requests - facet accumulation specification, e.g. count a certain facet dimension. FacetRequest is a basic component in faceted search - it describes the facet information need.

### Facet Userguide - Apache Lucene

There is nothing special about the numbering of the facets. So we could specify: Facet 1. Judges + Facet 2. Candidates + Facet 3. Sonatas. We number the facets in the way that is best for our own thoughts, and best for us to tell other people what we have discovered. Facet 1 is usually the facet that is most important to us. 33.

### Facets Tutorial 1 - Winsteps

Facets Guide Facets are all about enriching your search query responses. A facet is a tool that your users can use to further tune search results to their liking. It will generate a count for a value or range based on a field within a schema.

### Facets Guide | Swifttype Documentation

If you are using a headset you can press the answer button on the headset to answer the call. To call another user, dial the user's extension number. To place an outside call, dial the number to access an outside line (usually 9) and then dial the number of the party you are calling.
