Hay Guide Charts

The power of the Guide Chart lies in the scoring system and relations of the factors (or the Profile.) Points. The Hay Guide Chart itself comprises a point system, so that after job evaluation in terms of factors, dimensions and gradation, job

Access Free Hay Guide Charts

scores can simply be read from the chart. The point system uses geometric progression and is not linear. This preserves the integrity of the system at all ends of the grading spectrum.

The mold will also
make the hay less
palatable to livestock
and could potentially
be toxic, especially for
horses. Even hay baled
between 15%-20%
moisture will
experience what is
known as "sweating."

Access Free Hay Guide Charts

Sweating, in regard to hay bales, refers to microbial respiration, which will create heat and result in dry matter (DM) loss.
