The opposing argument, therefore, is that math is a man-made tool -- an abstraction free of time and space that merely corresponds with the universe. Just consider elliptical planetary orbits. While such an elliptical trajectory provides astronomers with a close approximation of the planet's movement, it's not a perfect one [source: Dehaene]. Several theories expand on this idea.

Is the Universe Made of Math? [Excerpt] - Scientific American

The history of mathematics is a history of humanity seeking to understand the universe. Therefore, many consider the holy grail of mathematics to be the same as that of physics: a theory of everything, a unified theory that explains all physical reality.. Math generally plays a vital role in any theory of everything, but contemporary cosmologist Max Tegmark even goes so far as to theorize that ...

I think it was a good way, but tastes change. I took a quick look around the internet for the contents of current liberal-arts mathematics courses and found quite a few including topics like "financial mathematics" or "consumer mathematics". It's also a good thing to know about interest rates, but a choice has to be made.
