In computing, a namespace is a set of signs (names) that are used to identify and refer to objects of various kinds.A namespace ensures that all of a given set of objects have unique names so that they can be easily identified.. Namespaces are commonly structured as hierarchies to allow reuse of names in different contexts.

### Namespace - Wikipedia

Pidof finds the process id's (pids) of the named programs. It prints those id's on the standard output. This program is on some systems used in run-level change scripts, especially when the system has a System-V like rc structure. In that case these scripts are located in /etc/rc?.d, where ? is the runlevel.
