Like plastic fabrication, metal fabrication depends largely on the family and grade of metal used in production. Some of the more commonly fabricated metals include steel, magnesium, iron, aluminum, copper, and nickel, each with their own various grades. Metals generally provide the following advantages over plastic fabrication:

Plastic/Metal Fabricating: Advantages and Disadvantages of ...

Plastic for fire, aluminum for everything else. I love the new Skull Buckets. Full-brim all the time, no matter what. Aluminum shows damage that plastic would hide; it's far easier to tell when it's time to replace a tin lid and you won't throw away a perfectly good hat just because ANSI suggests that you must.
