The Wild T1A Double Center Theodolite is used for low-order triangulation, cadastral work, tunnel traverses, general traversing, tacheometry, property surveys, mine surveys, building site lay-outs etc. - in fact for most survey and engineering tasks where first or second order accuracies are not essential.

### Wild T1 - Virtual Archive of Wild Heerbrugg

In contrast to the other Wild theodolites produced so far, the Wild T1 was a true repetition theodolite like the Carl Zeiss RThII. For this purpose the instrument has "...two independent cylindrical vertical axes and two horizontal clamps (one each for the lower and upper plate and shaped differently to avoid confusion)..."

### Theodolite transit operation, repair & training manuals ...

The Wild T0 however did this the same way as all other Wild instruments: by superimposing the image of two diametrically opposite parts of the compass circle on top of each other (coincidence reading). In addition to that the boussole of a Wild T0 can be locked in its position (see figure 11), by which the instrument becomes a normal theodolite.
