Zoonoses: Infectious Diseases Transmissible From Animals ...

A zoonosis (plural zoonoses, or zoonotic diseases) is an infectious disease caused by a pathogen (an infectious agent, such as a bacterium, virus, parasite or prion) that has jumped from a non-human animal (usually a vertebrate) to a human. Typically, the first infected human transmits the infectious agent to at least one other human, who, in turn, infects others.

Zoonoses - an overview | ScienceDirect Topics

Zoonoses are diseases of animal origin that can affect people. The diseases may be caused by bacteria, parasites, protozoa, fungi and viruses. Even if there is an infectious agent present, it does not always result in disease. Zoonoses depend on three factors; the infectious agent, a susceptible host and a way of spread.
